PROFESSIONAL EXPERIENCE

Application Development Intern, NYC Department of Buildings 07/2026 – 09/2026 | New York City, NY

- Developed features for an internal C# ASP.NET MVC application (POL) automating NYC DOB's budget approval and procurement request workflow, from data modeling through UI implementation
- Wrote SQL queries and designed validation logic to enforce multi-stage business rules across budget planning, monitoring, and procurement phases
- Collaborated with the team through code reviews and Agile sprints to deliver production-ready application modules

Software Engineer Intern, Koops Automation Systems 01/2026 – 05/2026 | Holland, MI

- Engineered a full-stack internal mapping platform used to manage floor space allocation across multiple industrial facilities, reducing reliance on static PDFs by 100%.
- Implemented interactive 2D floor plans using Angular, TypeScript, and Konva.js.
- Built a RESTful API with ASP.NET Core and Entity Framework, supporting project tagging, spatial metadata, and future ERP integration.
- Secured the platform using Azure Entra ID (OAuth2/OpenID Connect) with fine-grained role-based authorization.
- Designed and deployed cloud infrastructure using Azure Web Apps, Azure SQL, and Azure DevOps CI/CD pipelines.

Undergraduate Research Assistant, Grand Valley State University 01/2026 – 05/2026 | Grand Rapids, MI

- Applied search-based algorithms (e.g., Genetic Algorithms) to optimize robot behavior at run time.
- Designed and implemented autonomous robotic control strategies, emphasizing robustness and adaptability.
- Developed and evaluated simulation-based experimental environments using Webots to analyze system performance
- Designed and executed test cases to validate controller correctness, performance and stability.

Full Stack Developer Intern, Bee Coders 06/2025 – 08/2025

- Contributed to the development of full-stack mobile application using Flutter and NodeJS.
- Focused on UI/UX design, creating an intuitive and visually appealing user interface.
- Built backend with NestJS for efficient data management and API integration.

Front-End Developer Intern, TREND-IT 06/2024 – 08/2024

- Assisted in web development using WordPress and Elementor.
- Developed and customized web pages using HTML and CSS for improved user experience.
- Collaborated with team members to understand user requirements and improve the website.
- Participated in Agile-style team meetings, contributed to discussions on UI/UX improvements.

PROJECTS

Banking Web Application Winter 2026

- Designed and developed a banking web application using ASP.NET Core MVC and C#
- Implemented secure account operations including deposits, withdrawals, and fund transfers
- Developed transaction tracking and balance calculation logic
- Managed data using Entity Framework Core with SQL Server (CRUD operations, relationships, migrations)

BookWave - Android application Fall 2025

- Built a modern Android mobile application using Jetpack Compose with optimized UI/UX.
- Integrated Firebase services (Authentication, Firestore, Cloud Messaging) to enable scalable user management.
- Developed an AI-powered chatbot assistant using the Gemini API for book recommendations, summaries, and personalized reading, improving content discovery accuracy by 60%.

EDUCATION

Grand Valley State University, Combined Degree Programs (B.S./M.S.) in Software Engineering | 3.9 GPA 05/2027

- Focus: Software Engineering, Software Architecture and Design, Software Testing, Web & Mobile development.

SKILLS

Programming Languages: C#, C++, C, Python, Java, JavaScript, TypeScript, Kotlin, HTML/CSS

Frameworks: .NET Core, Angular, React, Jetpack Compose, Flutter, NodeJS

Tools: Git/GitHub, Jira, CI/CD, Docker, AWS

Software Engineering Practices: Agile/Scrum, RESTful API, Unit & Integration Testing, Debugging, Clean Architecture
